Re: Patient Files

Dear Patients:

The records of Women's Health Care Services have been transferred to a trust for safe keeping and have been placed in secure storage.

Consistent with Kansas law, we will provide your record if so requested. However, these are extremely sensitive records and many inappropriate attempts have been made to gain access to Dr. Tiller's records in the past. Thus, in order to protect patient privacy we require original documentation in order to release copies to the patient. Please return an original attached form signed by the patient in front of a notary public verifying the signature is her own. We have made the form as generic as possible so any notary public will not know the nature of the file requested. In addition to the form, please enclose a copy of her photo identification. We will then forward a copy of the records directly to the patient.

In conformity with Kansas law, we will require a fee of \$15.00 for retrieval of the records, which have been placed in underground storage, and \$.50 per page for copies. Upon receiving your request, we will ask for retrieval of the records immediately and will be able to give you the total amount due after determining the number of pages involved.

Yours very truly,
THOMPSON LAW FIRM, LCC
